Assessing the Nation's Health Literacy: Key Concepts and Findings of the National Assessment of Adult Literacy (NAAL)

**Organization:** American Medical Association (AMA)
**Author:** White, Sheida
**Published Date:** 2008

This report describes health literacy results from the landmark 2003 National Assessment of Adult Literacy (NAAL), the nation's most comprehensive measure of adult literacy in more than a decade. This report focuses specifically on how the NAAL relates to health literacy and the link between literacy and health outcomes. This 100-page report will be of interest to clinicians, researchers, educators, insurers, and policy makers in both the health and education fields.

- **Topic Areas:** Study Findings, Health Literacy, Language Access, Research
- **Resource Type:** Report, Publication, Research & Evaluation
